INVITING SURFACES, OPEN TO NEW EXPERIENCES

a project that bases its expressive power on colour, the vibrant star of the series, with well-balanced shades ranging from brighter to more natural tones an original and harmonious colour palette designed to create a wide variety of combinations, from classic and established to more experimental and sophisticated, offering maximum freedom to regulate the emotional temperature of the living space.

They are the result of a significant expansion of the digital decoration system, making it possible to obtain trendy shades that are in high demand among architects and interior designers but are scarcely or not at all available on the ceramic market. The design integrates influences from traditional majolica, whose craftsmanship underlies the gently undulating and softly imperfect surface.

Alongside the natural finish, which is Glossy, but soft to the touch, the glossy finishes further emphasise this link with the most typical ceramics of the Mediterranean tradition.
